

WEEKLY SCORECARDS

1. As the captain of your foursome, it is your responsibility to keep the official scorecard for your group. (You are that week's captain if your name appears on the first line of your foursome on the weekly draw sheet). **Another person in your group should always keep a second scorecard – for verification purposes, as well as in the event the captain's scorecard gets lost or accidentally destroyed (i.e., falls into river).**
2. Unfortunately, the current scorecard has only a small space for names. As we now have several ladies with the same first names, it is important to include last names. Last resort, due to lack of space, use the last name only.
3. If a player picks up their ball upon reaching their maximum stroke on any given hole, please place an X beside that hole's score. Please refer to the chart found in the World Handicap System document to determine maximum.
4. Please circle all birdies on the card. **NEW FOR 2022! Also make a note of any chip ins!!**
5. Total each person's 9-hole or 18-hole score and confirm the total with each player. Only total GROSS score is required. There is no need to calculate the net score. Writing down each player's handicap is also no longer required. Our scoring system will automatically calculate each player's net score by applying the appropriate handicap used for that week.
6. Have the card attested by the person keeping the backup scorecard.
7. Before leaving the golf course, please take the scorecard to the pro shop and place it in the appropriate box in the designated area .

Thank you in advance for helping make the scorecard process a little smoother for us.

Your 2022 Executive
